1. RS Wheels warranties wheels with a radical/lateral run out greater than 500 µm.
2. RS Wheels warranties wheels with cracks, leaks air.
3. RS Wheels warranties imperfections on finish including peeling of the paint, bubbles in the paint.

### **Warranty Exclusions:**

1. Structural damages due to installation, excessive off-road use, impact from accident, exceeding the load rating, a combination of tire and wheels does not follow the factory guidance.
2. Paint defect caused by installation, improper user treatment, physical impacts and damages, corrosion from environment and chemicals.
3. Warranty filed by non-original owner.
4. Wheels do not meet the fitment guidance.
5. Wheels with a previous history of repair, powder coating and other refinishes.
6. Wheels were used with accessories did not follow the guidance.
7. Wheels were installed on vehicle which modified to a different suspension geometry compared to factory spec.

### **Wheel Maintenance:**

Proper maintenance is required to keep the wheel finish in good condition. An improper treatment will result in peeling of clear coat and corrosion, to prevent your warranty being voided, following measures shall be considered:

1. Avoid sudden temperature change on your wheels, an extreme change in temperature on your wheel will cause disfigurement and unrepairable damages.
2. Always use non-detergent and pH-neutral soap to clean your wheels on a weekly basis will avoid corrosion and maintain the finish.
3. Wheels are specially machined/finished are not recommend for winter use. Snow Melter, salt and extreme humidity will speed the process of corrosion.
